

PRODUCT

Metallic meter boxes

GENERAL DESCRIPTION

Metallic meter boxes and / or hatches can be made in one and two leafs.

They are made of galvanized metal sheet 1.2-1.5 mm ready to receive on site directly, covering a wide range of applications.

They can be placed in counters of water, electricity, elevators, counters of H.E.,... for padlock or with built-in locks of keys approved by the companies.

These hatches are prepared to insert material of completion of the own facade like the clinker brick, obtaining uniformity in the facing.

There are with and without grid, and there are a variety of models.

Measurements range from 300-1400 mm in width and 400-1400 mm in height, and although there are standard measures, special measurements and configurations can be studied.
