

## PRODUCT

# Storage door

## GENERAL DESCRIPTION

The manufacture of this type of doors arises from the need to adapt to the gaps of the partitioning compartments that are used in these type of centers, where space, comfort and service are their main assets.

In this line we have developed a product that perfectly meets these requirements.

Our SELFSTORAGE door can vary its original design to suit even more the needs of each client.

We can manufacture this type of product according to the needs of the customer and adapting it to any type of installation that we pose.

In general they are pivotal and folding doors or sliding doors for the cases where it is necessary to optimize the space more.
