PUERTAS METÁLICAS

Hotel

The hotel metal doors are a variant of fire resistant door, and may have fire resistance features.

It is formed by a galvanized sheet frame of 1.5 mm of thickness, welded in its corners, and a panel of 61 mm of thickness with galvanized sheet of 6 mm filled with an insulating rock wool panel.

The accesories can be the same as in fire resistant doors such as antipanic bar, special locks, door closer springs, access control, windbreaks,…

The standard final finish will be in white oyster prelaquered sheet similar to RAL 9002 and black frame RAL 9005 or white as the leaf, and as special finishes , other RAL and imitation wood.
